COMPUTER BASED TEST - 2023

PAPER - I / தாள் - I **ANIMAL HUSBANDRY AND VETERINARY SCIENCE**

1.	Mischief is	punishable	under	sections	of any	one of the	following
		L					

- (A) 128 and 129 IPC
- (B) 228 and 229 IPC
- (C) 528 and 529 IPC
- **428** and **429** IPC
- (E) Answer not known

2. Match the following with suitable answers:

- (a) Incised wounds
- 1. Claws
- (b) Stab wounds
- 2. Fire arms
- (c) Lacerated wounds 3. Nails
- (d) Gunshot wounds
- **Swords** 4.

3

- (b) (d) (a) (c)
- 4 2 3 1
- 4 2 1 (B) 3
- (C) 4 1 2 3
- (D) 3 2 4 1
- Answer not known **(E)**

3. Match List I (Act) with List II (Year) and select the correct answer using the codes given below the List:

List I List II (a) Prevention of cruelty to Animal 1972 1. (b) Wild Life Protection 2. 1960 (c) Livestock importation 3. 1998 (d) Biomedical management 4. 1898 (b) (a) (c) (d) (A) 2 1 4 1 2 (B) 4 2 1 4 3 1 2. 3 (D)

- 4. Animal welfare board of India was established during
 - (A) 1954

(E)

(B) 1960

1962

- (D) 1972
- (E) Answer not known

Answer not known

- 5. The prevention of cruelty to Animals Act, 1960 extends to the whole of India except the state of
 - (A) Tamil Nadu

- (B) Kerala
- Jammu and Kashmir
- (D) Uttar Pradesh
- (E) Answer not known

6.	Whice station		Animal quarantine and certification	1
	(A)	Nagpur	(B) Ahmedabad	
	100	Chennai	(D) Kanpur	
	(E)	Answer not known		
7.	The	expenses incurred per unit of	output is	
	(1)	Cost of production	(B) Overhead charges	
	(C)	Expenditure	(D) Variable cost	
	(E)	Answer not known		
8.	The price	demand and supply of livesto	ock products are equal at ————	_
	(A)	Normal price	(B) Average price	
	427	Equilibrium price	(D) Telescoped price	
	(E)	Answer not known		
9.		ne economics of dairy farmin oments are included in	ng, the investment on cattle and farm	1
	(A)	Fixed cost	(B) Sunk cost	
	100	Fixed investment	(D) Junk investment	
	(E)	Answer not known		
10.		of livestock insurance is conent.	accounted under ———— cos	t
	(A)	Variable cost	Fixed cost	
	(C)	Average cost	(D) Marginal cost	
	(E)	Answer not known		

11.		ective wealth of the count	aggregate of all individuals wealth and ry.
	(A)	Social wealth	(B) Public wealth
	(C)	Individual wealth	National wealth
	(E)	Answer not known	
12.		ngayam Cattle Research rict of Tamil Nadu.	Station was established at
	(A)	Salem	Erode
	(C)	Namakkal	(D) Coimbatore
	(E)	Answer not known	•
13.		which programme, the ma	ale dogs are castrated and the females are
	(A)	Key village scheme	(B) ATIC programme
	(C)	ATMA programme	ABC programme
	(E)	Answer not known	
14.	TNL	LDA stands for	
	(A)	Tamil Nadu Linkage De	partment of Animal Husbandary
	(B)	Tamil Nadu Livestock I	
	(C)	Tamil Nadu Livestock I	Development Association
	(D)	Tamil Nadu Law Develo	opment Area
	(E)	Answer not known	

15.	Vete Act,	rinary Council of I	ndia wa	is established u	ınder the	Provision of IV	
	(A)	1994		(B) 1964			
	(C)	1974		(1) 1984			
	(E)	Answer not known	1				
16.	NSS	O stands for					
	(A)	National Social Su	rvey O	rganisation			
	(B)	National Sample S	Survey (Organisation			
	(C)	National Statistica	al Surve	ey Office			
	(D)	National Society Survey Office					
	(E)	Answer not known	ı				
17.	Whie	ch of the following i	s correc	tly paired?			
		ICAR Institutes		Location			
	(A)	NIANP	_	Hyderabad			
	(B)	NRC-Meat	_	Bengaluru			
	(C)	NBAGR	_	Hissar			
		NRC-Yak	_	Dirang			
	(E)	Answer not known	ı				
18.	The	total livestock popu	lation b	pased on 20 th liv	estock ce	nsus in India is	
	(A)	580.06 millions		B) 512.00	6 millions	.	
	(C)	612.06 millions		(D) 448.0			
	(E)	Answer not known	ı	` '			

19.	HAC	CCP stands for							
	(A) Hazard Analysis Critical Control Programme								
	(B)	Hazard Analysis Co-ordinat	ted Control P	oints					
	(C)	C) Hazard Analysis Control Points							
	(1)	Hazard Analysis Critical Co	ontrol Point						
	(E)	Answer not known							
20.	The	HACCP system comprises		principles/steps.					
	(A)	9	(B) 5						
	42)	7 .	. (D) 6						
	(E)	Answer not known							
21.		er food safety and standards stunning of pigs should be	s Act, 2006 tl	he concentration of CO ₂ for					
	(A)	80% by volume	(B) 75% ł	oy volume					
	4	90% by volume	(D) 98% ł	oy volume					
	(E)	Answer not known							
22.	Ove	r working of butter leads to _		_ defect					
	(A)	Gummy	(b) Greas	sy					
	(C)	Leaky	(D) Chees	sy					
	(E)	Answer not known							
23.	The	Iron content of Khoa exceeds	l	ppm					
	(A)	20	(B) 50						
		75	100						
		Answer not known	~ /						

24.	Whi	Which process is the first pre-requisite for sampling of milk?				
	(A)	Mixing	(B)	Cooling		
	(C)	Heating	(D)	Filtering		
	(E)	Answer not known				
25.	Iden	tify the antioxidant used in gh	_			
	(A)	Sodium Chloride	(B)	Butylated hydroxy anisole		
	(C)	Sodium alginate	(D)	Calcium Chloride		
	(E)	Answer not known				
26.		is the principal ant	i-mi	crobial factor present in the egg		
	(A)	Ovalbumin	(B)	Conalbumin		
	(C)	Avidis	(D)	Ovomucin		
	(E)	Answer not known				
27.	The	minimum fat present in the ice	e cre	am is		
	(A)	8%	(B)	10%		
	(C)	12%	(D)	11%		
	(E)	Answer not known				
28.	The	system of cleaning and sanitiz	ation	n followed in dairy industry is		
	(A)	GMP	(B)	CCP		
	6	CIP	(D)	CCS		
	(E)	Answer not known				

29.	29. Fermenting organism used for Yogurt preparation is				
	(A)	L. Delbrueckii ssp. bulgaric	us and streptococcus thermophilus		
	(B)	E.Coli			
	(C)	Pseudomonas Putrefaciens			
	(D) Staphylococcus aureus				
	(E)	Answer not known			
30.		letermine both heat stability is conducted	and ph of milk, the following platform		
	(A)	Alcohol Alizarin test	(B) Titrable acidity test		
	(C)	Sediment test	(D) Clot on boiling test		
	(E)	Answer not known			
31.	As p		isture content of dried milk should not		
	(A)	2%	(B) 4%		
	(C)	6%	(D) 8%		
	(E)	Answer not known			
32.	Bilin	rubin test is used to assess			
	(A)	The time of bruising			
	(B)	The efficiency of bleeding			
	(C)	The extend of muscle splash	ing		
	(D)	The efficiency of stunning			
	(E)	Answer not known			

33.		of ———is popularly called as water glass, used for ervation of eggs.
	(A)	Ammonium silicate
	(2)	Sodium silicate
	(C)	Potassium silicate
	(D)	Magnesium silicate
	(E)	Answer not known
34.	Inge	stion of under cooked beef and pork can cause
	(1)	Taeniasis
	(B)	Dermato mycosis
	(C)	Japanese B encephalitis
	(D)	(B) and (C)
	(E)	Answer not known
35.	Chic	ken Egg Yolk contains about ————— of cholesterol.
	(A)	106 mg
	(0)	226 mg
	(C)	430 mg
	(D)	75 mg
	(E)	Answer not known
36.	Gall	bladder is absent in
	(A)	Pig
	(B)	Sheep
	(C)	Cattle
	(0)	Horse
	(E)	Answer not known

37. Ossein is a

- (A) Pure protein from collagen
- Demineralized bone
- (C) Crude form of gelatine
- (D) Pure form of glue
- (E) Answer not known
- 38. Which of the following statements are true about Antemortem examination?
 - (i) To detect certain diseases which are toxic or calagions and whose identification is either difficult or impossible during postmortem
 - (ii) Antemortem examination is always conducted in Lairage only.
 - (iii) To diagnose disease conditions for control purposes.
 - (iv) To check the efficiency of slaughter and carcass dressing.
 - (A) (i) and (iv) only
 - (B) (iii) and (iv) only
 - (i) and (ii) only
 - (D) (ii) and (iv) only
 - (E) Answer not known
- 39. Bloom of meat is referred as the property of
 - Fresh carcass
 - (B) Frozen carcass
 - (C) Cooked meat
 - (D) Smoked meat
 - (E) Answer not known

40.	Dres	ssing percentage in broiler poultry is ———————————————————————————————————
	(A)	70 - 75%
	(B)	40 - 50%
	(C)	50 - 60%
	(D)	80%
	(E)	Answer not known
41.		imum permissible load for medium sized bullock in two wheeled cle fitted with ball bearing
	(A)	1800 kg
	(3)	1400 kg
	(C)	$1200~\mathrm{kg}$
	(D)	$1050~\mathrm{kg}$
	(E)	Answer not known
42.		device which alternates vacuum and atmospheric air between the per liner and teat cup shell is called as
	(A)	Vacuum pump
	(B)	Vacuum gauge
	(0)	Pulsator

(D) Milk claw

Answer not known

- - (A) 5 to 7
 - (B) 8 to 10
 - (C) 11 to 13
 - (D) 13 to 15
 - (E) Answer not known
- 44. (i) Animals like crocodiles and alligators and most non-mammals have homodont dentition
 - (ii) Most mammals have heterodont dentition.
 - (A) (i) and (ii) false
 - (i) and (ii) true
 - (C) (i) true and (ii) false
 - (D) (i) false and (ii) true
 - (E) Answer not known
- 45. In the scorecard for a dairy cow, the general appearance, dairy character, body capacity and mammary system will have following points
 - (A) 20, 30, 20 and 30
 - (B) 20, 20, 30 and 30
 - (c) 30, 20, 20 and 30
 - (D) 30, 30, 20 and 20
 - (E) Answer not known

46.	In w	ool, the wavelength of the crimp decreases as fibre diameter
	(11)	Increases
	(B)	Decreases
	(C)	Remains same
	(D)	Gets reduced
	(E)	Answer not known
47.		ing —————month, clip yields best quality wool which is te in colour and gives higher yields in sheep.
	(A)	March – April
•	(B)	July – August
	(C)	September – October
	(D)	November – December
	(E)	Answer not known
48.	The	gestation period of goats is
	(A)	112-120 days
	(B)	120-134 days
	(C)	136-142 days
	(0)	148-156 days
	(E)	Answer not known

49.	In captive management of wild animals, which of the following animals should be housed in single as it is solitary in wild					
	(i)	Lion				
	(ii)	Tiger				
	(iii)	Deer				
	(iv)	Elephant		•		
	(A)	(i) only	(B)	(ii) only		
	(C)	(i) and (ii) only	(D)	(iii) and (iv) only		
	(E)	Answer not known				
50.		ning of egg is more critical bation.	durii	ng the ———	days of	
	(A)	First 3 days	(B)	Last 3 days		
	(2)	First 14 days	(D)	Last 14 days		
	(E)	Answer not known				
51.		ch of the following manageme the cleanliness and to improve s?				
	1.	Dipping				
	2.	Grooming				
	3.	Clipping				
	(A)	1 alone correct	(B)	2 alone correct		
	(C)	1 and 2 are correct	(D)	3 alone correct		
	(E)	Answer not known				

52.		er requirement of dairy litions is———————————————————————————————————	cows and Buffaloes under average feeding – litres /day.
	(A)	70-75	(B) 65-55
	(C)	45-40	30-35
	(E)	Answer not known	
53.		estock species are comfort veen	able at Temperature Humidity Index (THI)
	(11)	65 and 72	(B) 72 and 78
	(C)	80 and 85	(D) 86 and 90
•	(E)	Answer not known	•
54.	Con	nfort zone for all cross bre	d cattle is
	(A)	Between 65-75°F	(B) Between 85-90°F
	(C)	Between 55-65°F	(D) Between 75-85°F
	(E)	Answer not known	
55.	The	quality of flour is respons	sible for the disease of
	(A)	Heart	
	(B)	Lung	
	(C)	Genital system	
	(2)	Musculo skeletal system	n
	(E)	Answer not known	

Which one of the following is incorrectly paired? 56.

Cattle breed

Unique feature

- (A) Vechur
- Miniature cattle
- Umblacherry (B)
- Excellent for wet ploughing
- Punganur
- Dwarf cattle
- (2) Nagori

- Milch cattle
- (E) Answer not known
- Match the buffalo breeds with its horn shape. 57.
 - (a) Surti

- Tightly curved horns 1.
- (b) Murrah
- 2. **Drooping horns**
- (c) Mehsana
- Sickle shaped horns 3.
- (d) Jaffarabadi
- Irregular shaped horns 4.

- (a) (b) 1
- (c) (d)
- 2
- (B) 1
- 2
- (C) 3
- 2 4

3

2

- 3 (D)
- 1
- 4 (E) Answer not known

4

1

What is the Gestation period of panthers? 58.

- 90-93 days
- 118-120 days (B)
- (C) 58-60 days
- (D) 110-113 days
- Answer not known (E)

59.		ows tne first norn ring appear reas in buffaloes it about ———		_	years.	– years,
	(A)	2 and 3	(B) 3	3 and 4	·	
	(C)	5 and 6	(D) 1	l and 2		
	(E)	Answer not known				
60.	The	term Roaster is used to denote				
	(A)	Newly weaned rabbit				
	(B)	Mature male rabbit				
	(C)	Rabbit below 20 weeks of age				
•	(D)	Culled rabbits		•	·	
	(E)	Answer not known				
61.	An a	borted calf is termed as	_			
	(A)	Bobby calf	(B) S	Slink ca	alf	
	(C)	Bull calf	(D) I	Heifer o	calf	
	(E)	Answer not known				
62.	A ste	erile hybrid of Pekins and Muso	covy D	uck is	called as	
	(A)	Muskin duck				
	(B)	Mubrie duck				
	(6)	Moulard duck				
	(D)	Mc Lead duck				
	(E)	Answer not known				

63.		The roughage and concentrate are processed together and compressed in a machine is called as				
	(A)	Baling				
	(D)	Feed block				
	(C)	Crumble				
	(D)	Flakes				
	(E)	Answer not known				
64.	Groundnut cake (GNC) should not be included more than 25% in swine feed because					
	(i)	It tends to produce a soft body fat				
	(ii)	Pigs are more susceptible to aflatoxin				
	(iii)	It may have troublesome laxative action				
	Which of the above statements are true about GNC?					
	(A)	(i) only				
	(B)	(ii) only				
	(C)	(i) and (ii) only				
	(D)	(i), (ii) and (iii)				
	(E)	Answer not known				
65.	Ene	rgy deficiency in pregnant sheep causes ———————————————————————————————————				
	(A)	Twin lamb disease (B) Milk fer				
	(C)	Grass tetany (D) Acidosis				
	(E)	Answer not known				

- 66. What is the method used to detect and identify animal materials in feed?
 - A) Feed microscopy
 - (B) Floatation technique
 - (C) Spot chemical test
 - (D) Physical tests
 - (E) Answer not known
- 67. Rumen bypass fat
 - (A) Interfere with fibre digestibility in the rumen
 - (B) Digested in the large intestine
 - (C) Fed to young calf
 - Support high energy demand of early lactation cows
 - (E) Answer not known
- 68. (i) Captive elephants may be provided 3-5 per cent protein for maintenance.
 - (ii) The energy requirement of elephant for basic metabolic process is to be 12-13 Kcal per kg body weight per day.
 - (A) (i) and (ii) true
 - (B) (i) true and (ii) false
 - (i) false and (ii) true
 - (D) (i) and (ii) false
 - (E) Answer not known

- 69. Loss of soluble minerals, sugars and nitrogenous constituents due to rain while hay making is called as
 - (A) Bleaching
 - (B) Washing
 - (C) Dilution
 - (D) Leaching
 - (E) Answer not known
- 70. Assertion [A] : Silage supplies only a small amount of undegradable protein
 - Reason [R] : The protein in silage is highly degradable
 - (A) [A] is true but [R] is false
 - Both [A] and [R] are true; and [R] is the correct explanation of [A]
 - (C) Both [A] and [R] are true; but [R] is not the correct explanation of [A]
 - (D) [A] is false and [R] is true
 - (E) Answer not known
- 71. When urea is fed at excessive levels to ruminants, large amounts of _____ are liberated in the rumen.

- (B) Nitrogen
- (C) Hydrogen
- (D) Oxygen
- (E) Answer not known

- 72. ——— is an example of probiotic organism added in the feed of non-ruminants as feed additive.(A) Streptococcus bovis
 - (B) Aspergillus flavus
 - Lactobacillus acidophillus
 - (D) Ruminococcus flavefaciens
 - (E) Answer not known
- 73. Which of the following statement(s) is/are true with respect to thiamine deficiency?
 - 1. Causes polyneuritis in animals
 - 2. In birds, characteristic paralysis of neck muscles
 - 3. Myelin sheath of the nerves are severely affected
 - 4. Causes black tongue in dogs
 - (A) 1, 2 and 3 are correct
 - (B) 1, 2 and 4 are correct
 - (C) 1, 3 and 4 are correct
 - (D) 2, 3 and 4 are correct
 - (E) Answer not known
- 74. Enzootic neonatal ataxia in lambs and calves is due to
 - (A) Zinc deficiency
 - Copper deficiency
 - (C) Iron deficiency
 - (D) Manganese deficiency
 - (E) Answer not known

75 .	High level of molybdenum in	n animal f	eed causes a conditioned
	(A) Zinc deficiency		
	(B) Iron deficiency		
	(C) Cobalt deficiency		
	Copper deficiency		·
	(E) Answer not known		
76.	Which of the following is cor	rectly pai	red?
	1. Monoamine oxidase	_	Copper
	2. Carbonic anhydrase	_	. Zinc .
	3. Pyruvate Carboxylase	_	Manganese
	4. Glutathrone peroxidase		Molybdenum
	1, 2 and 3 are correct		
	(B) 1, 2 and 4 are correct		
	(C) 2, 3 and 4 are correct		
	(D) 1, 3 and 4 are correct		
	(E) Answer not known		
77.	The anti nutritional factor p	resent in	the sal seed meal is
	(A) Gossypol		
	(B) Mimosine		
	(C) Saponin		
	(D) Tannin		

(E) Answer not known

- 78. Which one of the following is a saturated fatty acid?
 - (A) Oleic acid
 - (B) Linoleic acid
 - Stearic acid
 - (D) Arachidonic acid
 - (E) Answer not known
- 79. Which one of the following amino acids are effective metal binding agents and helps in transport and storage of metal elements throughout the body?
 - (A) Leucine and lysine
 - (B) Threonine and Tryptophan
 - Cysteine and Histidine
 - (D) Valine and glycine
 - (E) Answer not known
- 80. (i) Gross assimilation efficiency is a measure of how well an animal utilises it food. It is also known as apparent dry matter digestibility.
 - (ii) Gross assimilation efficiency depends upon the efficiency of the gut and the digestibility of the food
 - (A) (i) true and (ii) false
 - (B) (i) false and (ii) true
 - (i) and (ii) true
 - (D) (i) and (ii) false
 - (E) Answer not known

81.	In National Research Council (NRC) standard energy requirement for poultry is expressed in terms of				
	(A)	Digestible Energy (DE)			
	(B)	Net Energy (NE)			
	4	Metabolizable Energy (ME)			
	(D)	Total Digestible Nutrients (T)	DN)		
	(E)	Answer not known	,		
82.	Recurrent Selection (RS) and Recurrent Reciprocal Selection (RRS) are commonly used in				
	(A)	Cattle and Buffalo breeding	(B) Sheep and Goat breeding		
	(9)	Poultry and Swine breeding	(D) Duck and quail breeding		
	(E)	Answer not known	•		
83.		improvement of low producing see of exotic breed for coastal an	ng non descript cattle in India, th d tropical climate areas is	e	
	(A)	Holstein - Friesian	(B) Jersey		
	(C)	Brown Swiss	(D) Guernsey		
	(E)	Answer not known	` ·		
84.	cell	<u> </u>	somes (at metaphase stage) from on on the basis of size, shape and other		
	(A)	Idiogram	(B) Karyotype		
	(C)	Banding	(D) Dendrogram		
	(E)	Answer not known			

85	concentration	of adenine and the	Thymine was always equal to the concentration of cytosine was alwaynine. The above fact was discovered by	ys
	(A) E. Charg	aff and Coworkers		
	(B) J.D. Wat	son and F.H.C. Crie	ck	
	(C) Rosalind	Franklin		
	(D) Maurice	Wilkins		
	(E) Answer r	not known		
86.	In DNA, the chain by—	nucleotides are lin	ked together and forms polynucleotic	de
	(A) Covalent	bond	(B) Co-ordinate bond	
	(C) Hydrogen	n bond	Phosphodiester bond	
	(E) Answer r	not known		
87.	The Headquar	ters for Zoological S	Survey of India is situated in	
	(A) Chennai		(B) Mumbai	
	(C) New Delh	i	(6) Kolkatta	
	(E) Answer no	ot known		
88.	with the chance	•	one region of a chromosome interfering over to occur in the adjacent regioned as	
	(A) Co-incide	ence	(B) Interference	
	(C) Recombin	nant	(D) Non-recombinant	
	(E) Answer r	not known		

89.	Non-hereditary phenotypic changes that are indistinguishable or closely resemble conditions resulting from mutant genes are called				
	(A)	Expressivity	(B)	Incomplete penetrance	
	(0)	Phenocopy	(D)	Penetrance	
	(E)	Answer not known			
90.	_	otypically expressed because	_	copy of a recessive allele is econd copy of gene is absent, is	
	(A)	Dominance	(B)	Co-dominance	
	(°C)	Semi-dominance .	(11)	Pseudo dominance	
	(E)	Answer not known			
91.		probability that genes at arent is called	ny si	ingle locus are independent by	
	(A)	Identical by descent	(B)	Panmictic index	
	(C)	Probability index	(D)	Identical index	
	(E)	Answer not known			
92.	The calle		by 1	the mean value of its progeny is	
	(A)	Population mean	(B)	Average effect	
,	(C)	Breeding value	(D)	Genotypic value	
	(E)	Answer not known			
93.	The	heritability estimate for milk y	ield	in dairy cattle is	
	(A)	$0.\dot{4}0$	(B)	0.35	
	(C)	0.10	(D)	0.05	
	(E)	Answer not known	` '		
Anin	nal Hu	sbandry - 15.3.23 28			

94.	The gestation period of Great One horned Rhinocerous is					
	(A)	280 days	(B) 325 days			
	(C)	440 days	(D) 485 days			
	(E)	Answer not known				
95.	The	2N number of chromosome 60	is reported in			
	(A)	Cattle	(B) Buffalo			
	(C)	Sheep	(D) Pig			
	(E)	Answer not known				
96.	Pan	dharpuri is a breed of				
	(A)	Cattle	(B) buffalo			
	(C)	Monkey	(D) Camel			
	(E)	Answer not known				
97.	Vem	abur is a breed of ————	in Tamil Nadu.			
	(A)	Goat	(B) Sheep			
	(C)	Cattle	(D) Pig			
	(E)	Answer not known				
98.	Best	Mutton type of sheep breed of	Tamil Nadu is			
	(A)	Mecheri	(B) Coimbatore			
	(C)	Madras Red	(D) Nilgiri			
	(E)	Answer not known				

99.	99. The gas produced by ruminants that damage the atmosphere is		
	(A)	Oxygen	(B) CO_2
	(C)	Ammonia	(D) Methane
	(E)	Answer not known	
100.	With	ndrawal of this hormone trigger	rs lactogenesis
	(A)	Estrogen	(B) Glucocorticoids
	(C)	Glucagon	Progesterone
	(E)	Answer not known	
101.	High	est amount of cholesterol carry	ving lipoprotein in blood is
	(A)	VLDL	(B) LDL
	(C)	HDL	(D) Chylomicron
	(E)	Answer not known	
102.		n-Angiotensin-Aldosterone me ollowing ion	chanism causes the body to conserve
	(A)	Hydrogen	(B) Bicarbonates
	(0)	Sodium	(D) Potassium
	(E)	Answer not known	
103.	Sma	llest cells in the blood	
	(A)	Leukocytes	(B) Platelets
	(C)	Erythrocytes	(D) Phagocytes
	(E)	Answer not known	

104. Deficiency of which of the following clotting factor is res Hemophilia A bleeding disorder in dogs?			sponsil	ble for				
	(A)	Factor III		(B) I	Factor VIII			
	(C)	Factor IX	•	(D) I	Factor X			
	(E)	Answer not k	nown					
105.	Asse	rtion [A]:	The transport affected by the a				_	
	Reas	on [R] :	The glucose Co-transporter	and	sodium	share	the	same
	(A)	[A] is true [R]	is false	•		•		•
,	(0)	Both [A] and the [A]	[R] are true ar	nd [R]	is the con	rrect exp	olanati	ion for
	(C)	[A] is false and [R] is true						
	(D)	Both [A] and [R] are true but [R] is not the correct explanation for the [A]						
	(E)	Answer not k	nown					
106.	Whic	h of the follow	ing gas has high	affini	ty for hemo	oglobin?		
	(A)	Oxygen		(B) I	Hydrogen			
	(C)	Carbondioxide	e •	(1)	Carbon mor	noxide		
	(E)	Answer not k	nown					
107.	In eq	uines, digestic	on of a majority o	f cellu	ılose occurs	s in		
	(A)	Rectum		(B) (Caecum			
	(C)	Stomach		(D) I	Rumen			
	(E)	Answer not k	nown					

108.		ch one of the following ohydrates in intestine?	ions	facilitates	rapid	absorption	a of
	(A)	Ca ⁺⁺	(B)	Na ⁺			
	(C)	K ⁺	(D)	Cl ⁻			
	(E)	Answer not known					
109.	The	bone in the snout of Porcines	s is				
	(A)	Os rostri	(B)	Os phreni	c		
	(C)	Os navicularis	(D)	Os cordis			
•	(E)	Answer not known .		•		٠	
110.	The	type of papillae seen more or	n the T	orus lingua	of tong	gue are	
	(A)	Filiform	(B)	Fungiforn	ı		
	(C)	Circumvallate	(D)	Lenticular	r		
	(E)	Answer not known					
111.	Whi	ch of the statement is false w	vith re	gard to swe	ating?		
	(A)	Evaporation is bidirectiona	l heat	exchange			
	(B)	Apocrine sweat glands are domestic animals	impo	rtant for ev	aporati	ive heat los	ss in
	(C)	In dogs, sweating is insigni	ficant	in heat reg	ulation		
	(D)	Reflex sweating may oc temperature	cur ir	absence	of inc	reased cer	ntral
	(E)	Answer not known					

- 112. Thick and syrupy urine is seen in
 - (A) Cattle

(B) Pregnant goat

(0)

Equines

- (D) Canines
- (E) Answer not known
- 113. Which of the following statements are true about Abomasum?
 - (i) It is the first glandular portion of the ruminant digestive system
 - (ii) The low pH of abomasal contents is responsible for the death of the microbes
 - (iii) It is a spherical organ filled cyclo muscular laminae
 - (iv) Abomasal epithelium Secrete Hcl pepsin and mucus.
 - (A) (i) only
 - (B) (i), (ii) and (iii) only
 - (C) (i), (ii), (iii) and (iv) only
 - (i), (ii) and (iv) only
 - (E) Answer not known
- 114. The last segment of the coccygeal vertebra in fowl is designated as

- (B) Styloid process
- (C) Coccygeal mass
- (D) Lumbosacral mass
- (E) Answer not known

115.	OS p	enis in dog and cat is the transformation of structure.
	(A)	Corpus bulbar
	(3)	Corpus cavernosum
	(C)	OS Pedis
	(D)	OS Phrenic
	(E)	Answer not known
116.	The	nerve supplying the laryngeal musculature of the cattle is
	(A)	Hypoglossal nerve
	(B)	Vagus nerve
	(C)	Fascial nerve
	(D)	Oculomotor nerve
	(E)	Answer not known
117.	In ca	ttle, "Pipe stem liver" appearance is related to one of the following
	(A)	Chronic fascioliasis
	(B)	Haemonchosis
	(C)	Anthrax
	(D)	Amphistomiasis
	(E)	Answer not known
118.	Wood	ds Lamps technique is followed in the diagnosis of
	(A)	Parasitic diseases
	(B)	Bacterial diseases
	(C)	Viral diseases
	(10)	Fungal diseases
	(E)	Answer not known

- 119. Lose of body weight, pneumonia hacking cough, pleurisy, feces coated with mucus, pus cells and occasionally blood and on rectal examination reveal enlarged mesentric lymphnode, the above findings are related to one of the following in cattle.
 - (A) Contagious bovine pleuropneumonia
 - Tuberculosis
 - (C) MCF
 - (D) HS
 - (E) Answer not known
- 120. Which species of animals are more commonly affected by Toxocara Vitulorum in India?
 - (A) White cattle
 - Buffalo calves
 - (C) Sheep
 - (D) Goats
 - (E) Answer not known
- 121. Antigenic variation is commonly noticed in
 - (A) Trypanosomes
 - (B) Babesia Sp.
 - (C) Theileria Sp.
 - (D) Anaplasma Sp.
 - (E) Answer not known

122.	Blue	tongue virus is transmitted to sheep by
	(A)	Mosquitos
	(15)	Culicoides
	(C)	Earthworm
	(D)	Ticks
	(E)	Answer not known
123.	Inte	rnationally accepted serological test for diagnosis of leptospirosis is
	(A)	Dark Field Microscopy (DFM)
	(B)	ELISA
	(6)	Microscopic Agglutination Test (MAT)
	(D)	Fluorescent Antibody Test (FAT)
	(E)	Answer not known
124.	Vacc	ines containing killed bacteria are called
	(A)	Bacterins
	(B)	Toxoids
	(C)	Adjuvant
	(D)	Hapten
	(E)	Answer not known
125.		llus anthracis in a bovine blood smear showing square encoded blue lli in short chain surrounded by a pink capsule stained by
	(A)	Leishman's stain

(C)

(E)

Polychrome methylene blue

Gram's staining

(D) Ascolic precipitation test Answer not known

	Subs	stances that have the ability to increase (or) modulate the intrinsic	
	immunogenicity of an antigen are referred to as		
	(A)	Adjuvants	
	(B)	Emulsions	

- (C) Plasmids
- (D) Preservatives
- (E) Answer not known
- 127. Common serotypes of FMD virus prevalent in India
 - (A) Serotype 'O' only
 - (B) Serotypes 'O' and 'A' only
 - Serotypes O, A and Asia 1
 - (D) Serotypes O, A and C
 - (E) Answer not known
- 128. A number of cell types which can display antigen in a form that can be recognized by T lymphocytes are referred to as
 - (A) Interdigitating dendritic cells
 - (B) Langerhans dendritic cells
 - Antigen presenting cells
 - (D) Interstitial dendritic cells
 - (E) Answer not known

129.	Virus slowly increases in concentration during a long preclinical phase leading to progressively lethal disease is called		
	(11)	Slow infection	
	(B)	Chronic infection	
	(C)	Latent infection	
	(D)	Persistent infection	
	(E)	Answer not known	
130.	0. 'Hairy shaker disease' is caused by which virus		
	(A)	Lyssa virus	
	(B)	Pestivirus	
	(C)	Avula virus	
	(D)	Lenti virus	
	(E)	Answer not known	
131.	Coggin's test is commonly used for screening of ———————————————————————————————————		
	(A)	Equine Infectious Anemia	
	(B)	Equine Influenza	
	(C)	African horse sickness	
	(D)	Equine Viral arteritis	
	(E)	Answer not known	

132.	expo	d (Rabies) dogs do not have antibodies development by natural sure until death due to ———————————————————————————————————
	(A)	Glyco protein
	(B)	Matrix protein
	(C)	Nucleo protein
	(1)	Phospho protein
	(E)	Answer not known
133.	Asco	li's test is performed to detect one of the following disease
	(A)	Actinomycosis
	(B)	Actinobacillosis
,	(0)	Anthrax
	(D)	Anaplasmosis
	(E)	Answer not known
134.	Stra	wberry foot rot in sheep is caused by
•	(A)	Dermatophilus congolensis
	(B)	Fusobacterium neurophorum
	(C)	Candida albicans
	(D)	Arachno bacterium pyogens
	(E)	Answer not known
135.	'Saw	horse posture' and 'prolapse of third eye lid' are associated with
,	(A)	Tetanus
	(B)	Enterotoxemia
	(C)	Botulism
	(D)	Polioencephalomalacia
	(E)	Answer not known
		39 Animal Hushandry - 15 3 23

- 136. The causative agent for 'lumpy jaw' in cattle is
 - (A) Corynebacterium pseudotuberculosis
 - (B) Arachanobacterium pyogenes
 - (c) Actinomycer bovis
 - (D) Actinobacillus lignieresii
 - (E) Answer not known
- 137. Assertion [A]: Miracidium of amphistome prefer young snails for

penetration to complete the life cycle.

Reason [R]: Mantle cavity is completely filled with water and

pulmonary aperture opened occasionally.

- (A) [A] is true, [R] is false
- (B) [A] is true, and [R] is the correct explanation of [A]
- (C) [A] is false, [R] is true
- (A) is true but [R] is not the correct explanation of [A]
- (E) Answer not known

138.	Match	the	following	
------	-------	-----	-----------	--

Helminths

- (a) Haemonchus contortus
- (b) Gastrothylax crumenifer
- (c) Schistosoma nasale
- (d) Diphyllobothrium latum
- (e) Dirofilaria immitis

Drug of choice

- 1. Praziquantel
- 2. Anthiomaline
- 3. Oxyclozanide
- 4. Milbemycin oxime
- 5. Albendazole

	(a)	(b)	(c)	(d)	(e)
(A)	5	3	2	1	4
(B)		1	4	5	2
(C)	4	· 5	2	1 ·	3
(D)	5	2	3	1	4

- (E) Answer not known
- 139. FAMACHA used for classifying Helminth infected animals into categories based on anaemia is an acronym of
 - (A) Factoring AnaeMia in Animals CHArt
 - (B) FAffa MAlan CHArt
 - (C) Faecal egg count and Anaemia MAnagement CHArt
 - (D) Federal Anaemia MAnagement CHArt
 - (E) Answer not known
- 140. A parasite whose egg, larval stage and adult can cause pathogenesis
 - (A) Echinostoma sp.
 - (B) Paragonimus sp.
 - (C) Fasciola sp.
 - Schistosoma sp.
 - (E) Answer not known

- 141. The most probable sequence of development of a trematode
 - (A) Egg-sporocyst-miracidium-redia-cercaria-metacercaria
 - Egg-miracidium-sporocyst-redia-cercaria-metacercaria
 - (C) Egg-miracidium-redia-sporocyst-cercaria-metacercaria
 - (D) Egg-miracidium-sporocyst-redia-metacercaria-cercaria
 - (E) Answer not known
- 142. Assertion [A]: Echinococcus granulosus does not produce hydatid cyst in dogs.

Reason [R]: Dog act as definitive host for *Echinococcus granulosus*.

- (A) [A] is true, [R] is false
- Both [A] and [R] are true and [R] is the correct explanation of [A]
 - (C) [A] is false, [R] is true
- (D) Both [A] and [R] are true but [R] is not the correct explanation of [A]
- (E) Answer not known

143. Match the following drugs with their groups:

Drugs

- (a) Ivermectin
- (b) Albendazole
- (c) Praziquantel
- (d) Pyrantel pamoate
- (e) Levamisole

Groups

- 1. Imidazothiazoles
- 2. Tetrahydropyrimidines
- 3. Macrocyclic lactones
- 4. Benzimidazoles
- 5. Isoquinolones

_	(a)	(b)	(c)	(d)	(e)
41)	3	4	5	2	1
(B)		5	3	1	2
(C)	1	· 2	3	4 ·	5
(D)	5	4	3	2	1

- (E) Answer not known
- 144. Match the following flies with their pathogen transmission:

Flies

- (a) Aedes Aegypti
- (b) Phlebotomus sergenti
- (c) Simulium ornatum
- (d) Culicoides pungens
- (e) Tabanus striatus

Pathogens

- 1. Onchocerca gutturosa
- 2. Trypanosoma evansi
- 3. Onchocera gibsoni
- 4. Leishmania tropica
- 5. Borrelia anserina

	(a)	(b)	(c)	(d)	(e)
(A)	5	4	1	3	2
(B)	4	5	3	1	2
(C)	3	5	4	2	1
(D)	5	4	3	2	1

(E) Answer not known

145	Tho	narragita that is found in the lung of tigor is
140.		parasite that is found in the lung of tiger is
	(A)	Strongylus vulgaris
•	(25)	Paragonimos westermani
	(C)	Dictyocaulus viviparous
	(D)	Muellerius capillaris
	(E)	Answer not known
146.		Intamoeba <u>histolytica,</u> which of the following stage is capable of cing new infection
	(A)	Uninucleated cyst
	(B)	Binucleated cyst
	(C)	Trophozoite
		Quadrinucleated cyst
	(E)	Answer not known
147.		nals that die due to lightning strike show the following acteristic lesion
	(A)	Organ rupture
	(B)	Port-mortem clots
	مري	Arborescent markings on skin
	(D)	Hemorrhages on the brain
	(E)	Answer not known
148.	Wou	nd caused by a bullet oval nail is known as
	(A)	Laceration
•	(B)	Perforation

(C) Erosion

(E)

(D) Concussion

Answer not known

149.	(i)	Clinical	signs	are	pathogn	omonic	for	rabies	in	wild	anima	ls.
	\- /				I 9							

- (ii) Postmortem and laboratory examination for evidence of lyssa viruses is the only method of definitive diagnosis in animals.
- (A) (i) and (ii) true
- (B) (i) and (ii) false
- (i) false and (ii) true
- (D) (i) true and (ii) false
- (E) Answer not known

150. Which of the following is not correctly paired with its counter part?

- A) Posthitis Glanspenis
 - (B) Funiculitis Spermatic cord
 - (C) Exostosis Bone
 - (D) Hematocele Tunica vaginalis
 - (E) Answer not known

151. Match the following:

- (a) Amyelia 1. Duramater
- (b) Amelia 2. Piamater
- (c) Pachymengitis 3. Spinal cord
- (d) Leptomeningitis 4. Limbs
 - (a) (b) (c) (d)
- (A) 3 2 1 4
- (B) 3 1 4 2
- (C) 1 4 3 2 3 4 1 2
- (E) Answer not known

152. The given statements are the important cytological features of transmissible venereal tumour.

Which statement is not true to the fact?

- 1. Tumour cells appears as homogenous round to poly hedral and in uniform sheets.
- 2. Nuclear condensation with cytoplasmic brown black pigmentation is prominent.
- 3. Cytoplasmic punctate vacuolation is characteristic feature.
- 4. Mitotic figures are seen
- (A) 2 and 3 are not true
- 2 alone is not true
- (C) 3 alone is not true
- (D) 1, 3 and 4 are not true
- (E) Answer not known
- 153. In pox, inclusion bodies are found in the epithelial cells and are called
 - (A) Kocks bodies
 - (B) Negri bodies
 - Bollinger bodies
 - (D) Pink bodies
 - (E) Answer not known

- 154. Consider the following statements pertaining to third degree of burns in animals. Pick up the <u>unrelated</u> statement.
 - 1. Heat penetrates into the dermis of skin
 - 2. The fibrillar appearance of the connective tissue of dermis is transformed into amorphous granular mass.
 - 3. Destruction of deeper tissues like bones, muscles even CNS commonly occurs.
 - 4. Black discolouration of skin, necrosis of tissue, sloughing of necrosed tissue leaving an ulcer.
 - (A) 1 and 2 are unrelated
 - (B) 3 and 4 are unrelated
 - 3 alone is unrelated
 - (D) 4 alone is unrelated
 - (E) Answer not known
- 155. Caseation in tuberculosis is not observed in
 - 1. Birds
 - 2. Cows
 - 3. Wild bisons
 - 4. Sheep and Goats
 - (A) 1, 2, 3, 4 are correct statements
 - (B) \downarrow 1, 2, 3, 4 are false statements
 - (c) 1 is correct and 2, 3, 4 are false statements
 - (D) 1, 2, 3 are false statements and 4 is correct
 - (E) Answer not known

- 156. Which of the following statements are true with metastatic calcification of soft tissues?
 - 1. Mainly targets the intima and tunica media of vessels
 - 2. Primary defect is an imbalance in calcium and phosphate concentration in the blood.
 - 3. Calcified tissues appear black with a special stain Von-Giesons.
 - 4. Inappropriate elevation of PTH in the circulation is major factor of induction.
 - (A) Statements 1, 2, 3 and 4 are true
 - (B) Statements 1, 2 and 3 are true, 4 is false
 - Statements 1, 2 and 4 are true, 3 is false
 - (D) Statements 2, 3 and 4 are true, 1 is false
 - (E) Answer not known
- 157. The predisposing factor for the cause of Aspergillosis in broiler chicks are
 - 1. Inclement weather
 - 2. Close confinement in damp houses
 - 3. Too much of sunshine
 - 4. Smooth floor
 - A) 1 and 2 are correct, 3 and 4 are false
 - (B) 1, 2, 3 are false, 4 is correct
 - (C) 3 and 4 are correct, 1 and 2 are false
 - (D) All 1, 2, 3, 4 are correct statements
 - (E) Answer not known

158.	The	following organic compounds are fixed oils except
	(A)	Olive oil
	(B)	Cod liver oil
	(C)	Castor oil
	(2)	Thymol
	(E)	Answer not known
159.	Picra	ate paper test is used for the diagnosis of
•	(A)	Cyanide poisoning
	(B) _.	Nitrate poisoning .
	(C)	Nitrite poisoning
	(D)	Lantana camara poisoning
	(E)	Answer not known
160.		mucous membrane appears in chocolate brown colour in the
		wing poisoning
	(A)	Cyanide
'	(B)	Nitrite
	(C)	Lead
	(D)	Mercury
	(E)	Answer not known
161.	The	following chemicals are organochlorine compounds except
101.		DDT (B) Aldrin
,	(A)	Malathion (D) Endosulfan
	₹ ∪) (E)	Answer not known
	(E)	Allewer not known

162.	62. Gossypol is the toxic principle present in									
	(A)	Castor bean	(B)	Ground nut cake						
	(3)	Cotton seed	(D)	Ipomoea						
	(E)	Answer not known								
163.		nsider the following statements about aminoglycosides and choose the ht answer:								
	(A)	Enhanced oral bioavailability								
	(B)	Tendency to cause kidney dam	nage							
	(C)	Slow induction of resistance								
	(D)	$\label{lem:predominantly active against} Predominantly active against$	gran	n negative organism						
	(E)	Answer not known								
164.	Reco	nstituted penicillin should be u	.sed	in						
	(A)	02 days	(B)	04 days						
	(C)	05 days	(D)	07 days						
	(E)	Answer not known								
165.	Whic	h of the statement (s) are corre	ect w	rith respect to pentobarbitone?						
	I.	Intermediate Acting in dog an	d ca	t						
	II.	Short acting in horse and rum	inar	nts						
	III.	Has no effect on Horse								
	IV.	Poorly soluble in water								
	(A)	I, II and III are correct								
	(B)	II, III and IV are correct								
	(C)	I and II correct								
•	(1)	I, II and IV are correct								
	(E)	Answer not known								

166.		Among the following injectable anaesthetics, which one is clinically used as an anticonvulsant drug?								
	(A)	Thiopental	(B)	Thiolbarbital						
	40)	Phenobarbital	(D)	Methohexital						
	(E)	Answer not known								
167.	The	following antibiotic has remar	kable	activity against mycoplasma						
	(A)	Penicillin	(B)	Colistin						
	(0)	Tylosin	(D)	Kanamycin						
	(E)	Answer not known								
168.	The	following drugs are ultra short	acti	ng barbiturates except						
	(A)	Thiopental sodium	(B)	Thiamylal sodium						
	4	Pentobarbital sodium	(D)	Hexobarbital sodium						
	(E)	Answer not known								
169.	Loca	l anaesthetic that is used topic	cally	on the cornea of animal is						
	(A)	Lidocaine	(B)	Mepivacaine						
	(C)	Procaine	(1)	Proparacaine						
	(E)	Answer not known								
170.	Which of the following anaesthesia is performed for Rumenotomy?									
	(A)	Plexus anaesthesia	(B)	Paravertebral anaesthesia						
	(C)	Epidural anaesthesia	(D)	Infiltration anaesthesia						
	(E)	Answer not known								

	(A)	Bronchodilators	(B)	CNS stimulants								
	(C)	CNS depressants	(1)	Tocolytics								
	(E)	Answer not known										
172.	Exan	nple of Phase II reactions										
	(A)	Oxidation	(B)	Reduction								
	(C)	Hydrolysis	(1)	Methylation								
	(E)	Answer not known										
٠												
173.	Which drug is used for Oesophageal groove closure?											
	(A)	Copper sulphate	(B)	Zinc sulphate								
	(C)	Sodium bicarbonate		All the above								
	(E)	Answer not known										
174.	The study of sources of drugs is called as											
	(A)	Pharmacognosy	(B)	Pharmacobotany								
	(C)	Pharmacodynamic	(D)	Pharmacokinetic								
	(E)	Answer not known										
175.	Pharmacokinetics refers to all except											
	(A)	Absorption	(B)	Distribution								
	``	Mechanism of action	` '	Excretion								
	(E)	Answer not known	` ,									

171. Isoxuprine and clenbuterol are categorized under one of the following

176. Which of the following is incorrectly paired?											
	1.	ED 50	 The Dose of drug resured to produ predetermined response is 50% of the am the median effective dose. 							-	
	2.	LD 50	_		When death is the response 1 as in lathe toxis studies the ED 50 is called the median lath Dose						
3. Affinity – Tendency of a drug to combine with pakind of receptor								n partic	ular		
	4. .	Agonist .	-	Drug recep		poss	ses affi	nity for a	a ma	any kin	d of
	(A)	1									
	(0)	4									
	(C)	3									
	(D)	2									
	(E)	Answer not kr	owņ	l							
177.	Frac	ture resulting f	rom	diseas	se cond	litio	n is kno	own as			
	(A) .	Spontaneous f	ract	ure		(B)	Second	lary fracti	ıre		
	(0)	Pathological fi	racti	ıre		(D)	Green	stick fract	ture		
	(E)	Answer not kr	own	ı							
178.	In pl	ain X-ray, one	of th	e follo	wing r	enal	stone	does not c	ast s	shadow	
	(A)	Uric acid				(B)	Oxalat	e			
	(C)	Phosphate				(D)	Calciu	m			
	(E)	Answer not kr	nowr	ı							

179.	9. The recommended site for epidural anaesthesia in equine is							
,	A) Between 1st and 2nd coccygeal vertebrae							
	(B) Between 3 rd and 4 th coccygeal vertebrae							
	(C) Last Lumbar and first sacral vertebrae							
	(D)	Last sacral and first coccygeal	vertebrae					
	(E)	Answer not known						
180.	A dry gangrene caused by the pressure of the collar on the top of the neck of the horse is called as							
	(A)	Bed sore	(B) Saddle gall					
	(6)	SIF fast	(D) Yoke gall					
	(E)	Answer not known						
181.	181. Which one of the following gas induces diffusion hypoxia during r							
	(A)	Halothane	(B) Nitrous oxide					
	(C)	Isoflurane	(D) Seroflurane					
	(E)	Answer not known						
182.	pree: feel a	A yellowish white substance formed due to gradual hydrogenation of preexisting fats in a carcass kept in moist condition which has a greasy feel and strong musty odour. The above findings are refers to one of the following.						
	(A)	Riger mortis	(B) Putrefaction					
	(C)	Mummification	Adipocere					
	(E)	Answer not known	_					

183.	•	ical removal of the yolk sac rimental purpose is	fron	n newly hatched out chicks for					
	(A)	Gizzardectomy	(B)	Deutectomy					
	(C)	Ingluviotomy	(D)	Pinioning					
	(E)	Answer not known							
184.	Membranous obstruction of teat in cattle is called as								
	(A)	Teat polyp	(B)	Contracted sphincter					
	(0)	Teat spider	(D)	Milk stone					
•	(E)	Answer not known							
185.	Absence of moisture in the air promotes one of the following in a dead body								
	(A)	Mummification	(B)	Putrefaction					
	(C)	Maceration	(D)	Saponification					
	(E)	Answer not known							
186.	In condition of ankylosis, atrophy and contraction of the neck muscles of foetus in mares is called								
	(A)	Perosomus elumbis	(B)	Ring womb					
	(C)	Achondroplasia	P	Wryneck					
	(E)	Answer not known							

187.	Pros	stagla	ndin	F ₂ α is	the lii	ne of tre	eatment for a case of false anoestrum			
101.	when									
	(A)	Anii	Animal is pregnant							
	(B)	A do	A dominant follicle is present							
	(C) A corpus albicans is present									
	(2)	A m	ature	corpus	luteu	ım is pre	esent			
	(E)	Ans	wer n	ot knov	wn					
188.	Whi	ich of	the fo	llowing	g is inc	correctly	y paired?			
	(I)	ЕТТ	' – En	nbrvo T	ransf	er Techn	nology			
	(II)		•	VIVO I	•	•				
	` ,									
	(III)	PRI	D – P	rogeste	erone l	Releasin	ng Intra Vaginal Device.			
	(IV)	CID	R - C	ontroll	ed Int	ernal Di	rug Release Device.			
	(A)	(I) o	nly			,	(B) (II) only			
	(C)	(III)	only				(D) (IV) only			
	(E)	Ans	wer n	ot knov	wn					
189.	Match correctly the average ejaculate volume of semen by different far animals (in ml) are:						ate volume of semen by different farm			
		Cattl			1.	125				
	• •	Sheep			2.	215				
	(c)	Horse			3.	1				
	(d)	Pig			4.	5-8				
		(a)	(b)	(c)	(d)					
	(A)	4	1	2	3					
	(B)	• 3	4	2	1					
	(6)	4	3	1	2					
	(D)	2	3	1	4					
	(E)			ot knov	wn					
Anim	al H	usbano	dry - 1	5.3.23		56				

	(A)	40°C to 42°C	(B)	42°C to 46°C					
	(C)	50°C to 55°C	(D)	37°C to 40°C					
	(E)	Answer not known							
191.	91. The gloved hand method of semen collection is commonly practi								
	(A)	Boar	(B)	Bull					
	(C)	Stallion	(D)	Dog					
	(E)	Answer not known							
192.	The	Leydig cells are stimulated to s	ecre	te androgen by					
	(A) Follicle Stimulating Hormone (FSH)								
	(B)	Androgen Binding Protein (ABP)							
	(C)	Inhibin							
	(2)	Lutenizing Hormone (LH)							
	(E)	Answer not known							
193.	Winl	Winking of clitoris is a characteristic sign of estrus in							
	(A)	Sow							
	(B)	Cow							
	(6)	Mare							
	(D)	Cat							
	(E)	Answer not known							

190. The inner temperature of the artificial vagina should be in between

- 194. In boars, the gel like consistency of seminal plasma is due to
 - (A) Highly viscous vesicular gland secretion
 - (B) High chloride content of prostate secretion
 - (C) High ergothioneine content of ampullary secretion
 - High sialomucin concentration of cowper's gland secretion
 - (E) Answer not known
- 195. Pulmonary emboli is an example for one of the following
 - (A) Cardiogenic shock
 - (B) Hyporolemic shock.
 - (C) Distributive shock
 - (D) Anaphylactic shock
 - (E) Answer not known
- 196. Lactation Tetany in ruminants is due to
 - (A) Hypo calcemia
 - (B) Hypo glycemia
 - (C) Hypo natremia
 - Hypo magnesemia
 - (E) Answer not known
- 197. Post-coital pyometra is noticed in
 - Trichomoniasis
 - (B) Vibriosis
 - (C) Brucellosis
 - (D) IBRT
 - (E) Answer not known

198.	The term 'Blind Staggers' is associated with one of the following mineral toxicity					
	(A)	Copper				
	(B)	Molybdenum				
	10)	Selenium				
	(D)	Chromium				
	(E)	Answer not known				
199.	(A) (B) (C) (D) (E)	ormal dogs, daily urine output is about 45 ml/kg/24hr 100 ml/kg/24hr 10 ml/kg/1hr 5-10 ml/kg/hr Answer not known				
200.		ne differential diagnosis of wasting form of bovine kerosis, which of				

- the below is incorrect?
 - (A) Primary indigestion
 - (B) Abomasal displacement
 - Traumatic Reticulitis
 - Rabies and Hypomagnesemia
 - Answer not known **(E)**
